FOR IMMEDIATE RELEASE

February 24<sup>th</sup>, 2017

FIME Group Product Announcement

Have you heard?! FIME Group has 3 important announcements for the Rex Zero 1!

1. The Rex has a new model, the Compact.
2. We went through the hoops so our Marylanders can protect themselves. Rex Zero 1S is now on the Maryland Roster. Maryland Part Numbers: **REXZERO1S-04, REXZERO1S-05**
3. With all the demand from our magazine restricted states, we have a 10 round magazine coming shortly.

Arex is located in Slovenia and has over 20 years of design, manufacturing, and CNC experience. When Arex was designing the Rex Zero 1, they knew this was going to be one of the best pistols around. Rex is actually Latin for King. With all the recent reliability/torture tests, it has proven to be an accurate name.

Rex Zero 1 is manufactured out of T7075-T6 Aluminum with full length rails, full length dust cover, an integrated picatinny rail, and a 1 piece cold hammer forged barrel made from a solid bar stock. The parts are then Nitrocarburized to protect against corrosion and wear. The Rex was designed for hard use with expected 30,000 rounds of service life and has passed extensive NATO/Slovenian military based tests.

The controls match the well-engineered frame. They feature an ambidextrous magazine release and safety lever. The Slide stop/Decocker lever are integrated into one. Pushing up on the lever is the slide stop, press down will release the slide, press down again and it will decock the hammer. Field strip can be accomplished without pulling the trigger. You can run this in Double Action/Single Action or Single Action Only. If it is your preferred carry, it can be "cocked and locked". Double Action trigger pull will be 13 pounds, while the single action trigger pull is going to be 5 pounds. The trigger will reset with only .16" of travel.

Magazines come in 3 different sizes, 15 rounds and 17 rounds, and the new 10 round magazine (coming soon) for the states that have restrictions. We believe everyone should have their ability to protect themselves, even the ones that are unfortunately in the restricted states. The 10, 15, 17 round magazines will work for Compact. Only the 10 and 17 round magazine will work with the Standard. The best part is the MSRP on the magazines are \$25. This allows you to stock up on magazines, a great price for spares or if you need them for an upcoming class. Make sure you pick up a few more.
